anexia

+ BE YOURSELF – BECAUSE THAT'S HOW WE WANT YOU TO +

At Anexia, we take responsibility for all the **challenges of the digital world** – each and every day. That's because we see ourselves as the **"Digital Transformation Engine".** And how do we succeed in this mission? It's simple. We are a family of facilitators with innovative ideas. We're capable of, want to, and allowed to make things happen. That's what makes us so unique! Do you want to be a part of our digital revolution and make history with us? **#joinourrevolution**

SOFTWARE ENGINEER (M/W/D) – CLOUD SERVICES (PYTHON)

Klagenfurt, Vienna, Graz, Karlsruhe, Remote | full time

Are you driven by passion for and have a keen interest in innovative technology and cloud services? Are you a dedicated person who enjoys working independently and is highly quality-conscious? If so, you are the right person for this position, in which you will have the opportunity to actively help shape Anexia Services and be involved in the development of new features and technologies that offer our customers genuine added value.

#PROFILE

As Software Engineer – Cloud Services you will focus on the development and provision of **secure services with a high level of availability** in the Anexia Cloud ecosystem. Your work in our team will particularly focus on services like CloudDNS and Baremetal Provisioning, as you help to develop the backend services based on Python, Django, and Django REST Framework.

In the **CloudDNS project** you will help shape the future of our hosted DNS services and enable our customers to rely on us in all matters related to DNS. Relevant here are both correct and rapid distribution of data, the recording of fine-grained statistics, and the provision of best performance for exacting demands.

Baremetal Provisioning constitutes the realization of a part of our vision of an automatic data centre. The focus here is the fully automated commissioning of servers and the mapping of the lifecycle of our hardware. An additional challenge in this context are our **more than 90**

PoPs, on which this project will form a central component of our infrastructure in the future. We work in a dispersed and agile manner, relying on individual responsibility and ensuring the quality of our services through sophisticated CI pipelines and peer reviews.

#WANTED

- Completed technical education (HTL, FH, TU) or relevant professional experience
- Very good knowledge of Python
- Experience with Linux, as well as an understanding of the interaction between networks, operating systems, and software
- Skilled in the use of relational databases (MySQL, MSSQL, PostgreSQL, etc.)
- Knowledge in the use of automation tools is an advantage (Ansible)
- Ability to work work independently and reliably, a strong customer and service focus, and a high level of quality awareness
- Enthusiasm and a high motivation to learn new technologies
- Very good knowledge of English, (knowledge of German is an advantage)

#REWARD

Anexia grew up as a family, and with our growth strategy, we intend to keep it that way. We like to take responsibility, respect one another, and we know that we can achieve whatever we put our minds to. We look after Anexia, and Anexia looks after us. Enthusiasm, experience, and competence count, so you can expect a fair salary and numerous benefits.

salary range

min. 46.000€

Our benefits

We are more than just a workplace. Therefore, we offer our employees many benefits (which partly depend on your position and location): good transport connections and flexible working hours. Period. Not to mention further training, a mentoring program, free parking, a mobile phone and notebook, snacks and drinks, company cars, employee events, a fun corner, ...
