+ BE YOURSELF – THAT'S HOW WE WANT YOU TO BE +

At Anexia, we take responsibility for all the **challenges of the digital world** – each and every day. That's because we see ourselves as the **"Digital Transformation Engine".** And how do we succeed in this mission? It's simple. We are a family of facilitators with innovative ideas. We're capable of, want to, and allowed to make things happen. That's what makes us so unique! Do you want to be a part of our digital revolution and make history with us? **#joinourrevolution**

SOFTWARE ENGINEER (M/W/D) FÜR R&D (GO, PYTHON)

Vienna, Klagenfurt, Graz | full time

You have the desire and determination to constantly expand your knowledge and get acquainted with new issues and tasks. You view complex problems as a challenge and enjoy finding solutions. Our R&D team is just the right fit for you then. As part of this team you get the chance of shaping the future of Anexia service offerings, developing new features and solutions, bringing real added value to our customers and being an enabler for their success.

#PROFILE

In our Anexia R&D team, we work together to come up with innovative solutions. In this exciting position, you will be responsible for translating complex tasks into code, developing system-oriented services, providing the business logic for defined APIs and integrating new technologies into Anexia's broad service stack. You will be working with Git-based workflows, not only developing the next generation of Anexia services, but also making sure deployments run smoothly. You will write tests for your code and take ownership of your creations. Another key task will be analyzing bug reports and filling the role of internal contact when solving issues in coordination with other teams.

As a software engineer, you will understand the importance and implications of your work, and thereby have a high level of quality awareness. Your input and ideas will contribute to everyone's success and be particularly important when dealing with challenging and multifaceted tasks. If you are a team player, you will be sure to enjoy working with our motivated and agile team.

#WANTED

—

- Completed technical qualification (technical college or university) or prior experience in high-level development and a strong understanding of software architecture.
- Experience in Go and/or Python.
- Experience with Linux, as well as an understanding of the interaction between networks, operating systems, and software.
- Skilled in the use of relational databases (MySQL, MSSQL, PostgreSQL, etc.).
- Basic knowledge of Docker is an advantage.
- Ability to work work independently and reliably, a strong customer and service focus, and a high level of quality awareness.
- Systematic and analytical mind, as well as a high level of motivation for learning new technologies
- Very good knowledge of English (knowledge of German would be an advantage).
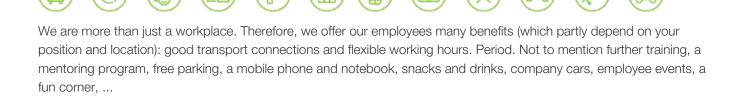

#REWARD

—

Anexia grew up as a family, and with our growth strategy, we intend to keep it that way. We like to take responsibility, respect one another, and we know that we can achieve whatever we put our minds to. We look after Anexia, and Anexia looks after us. Enthusiasm, experience, and competence count, so you can expect a fair salary and numerous benefits.

salary range

min. 46.000€

Our benefits

We are more than just a workplace. Therefore, we offer our employees many benefits (which partly depend on your position and location): good transport connections and flexible working hours. Period. Not to mention further training, a mentoring program, free parking, a mobile phone and notebook, snacks and drinks, company cars, employee events, a fun corner, ...
